Graphic Imaging Services Hosts Fujitsu Execs on Tour

Las Vegas, Nevada – Last month, Graphic Imaging Services, Inc. (GISI), a Nevada company that offers expertise in imaging and mapping solutions along with products for large and small format imaging, hosted a Japanese contingent from PFU Limited, a Fujitsu Company, on a tour of Las Vegas businesses that use Fujitsu scanners and imaging equipment. Fujio Wajima, President and CEO of PFU Limited, was in attendance to see first-hand how equipment at The Venetian Hotel was performing. “The visit was very interesting and meaningful for me in our efforts to continue to find ways to improve our equipment,” said Wajima. “I was also happy to see that this renowned hotel has found satisfaction using ScanSnap scanners in their business application, provided to them by Graphic Imaging Services.”

Graphic Imaging Services has been providing imaging solutions and services to The Venetian for more than four years. “Our ability to offer on-site service and support for The Venetian’s Fujitsu scanners is key to our relationship with the hotel’s Accounting and New Development Departments,” says GISI President Lisa Desautels. “We have been able to capture large amounts of their paper data for archiving using the Fujitsu scanners, which in turn has helped streamline their operations.”

The Venetian Resort Hotel Casino is the largest AAA Five-Diamond rated Resort in America. The Venice-themed luxury hotel and casino is located on the Las Vegas Strip and has 4,049 suites and a 120,000 sq ft (11,000 m²) casino. Combined with the adjacent Sands Expo Convention Center and The Palazzo Hotel and Casino Resort, it is part of the largest hotel and resort complex in the world.

PFU Limited is a leading manufacturer of Fujitsu brand scanners. With their state-of-the art document scanners at the core, PFU supports clients around the world in converting hardcopy documents into electronic form by providing imaging technologies and software that increases the integrity of documents.
