FOR IMMEDIATE RELEASE – January 30, 2009

Graphic Imaging Services, Inc. and Statewide Fire Protection secure critical paper drawing electronically

Las Vegas, Nevada – Graphic Imaging Service, Inc. (GISI), a Nevada corporation, has contracted with Statewide Fire Protection for the scanning of documents and drawings for various projects. The ongoing project is expected to continue indefinitely. “Statewide Fire has been progressive in securing their legacy data. These drawings are critical to Statewide Fire’s clients and have already been effective in creating a single source of truth” says Lisa Desautels, President of GISI. The digitized drawings are stored in centralized location. Statewide uses the program “TIFFAny Archive & Retrieval software” to retrieve the drawings quickly and easily from the network.

Graphic Imaging Services scan the selected drawings to a digital format. Once approved through Quality Assurance, the drawings were indexed to a database and imported into the TIFFAny Software (which was customized for Statewide Fire) so the drawings could be found quickly and easily.

Statewide Fire Protection has built a reputation as a full-service fire protection contractor that provides quality at a cost-effective price. Statewide Fire Protection has a wide range of expertise in the commercial, residential, and industrial fire protection markets. Statewide Fire Protection has special capabilities in the following types of projects: high-tech/microelectronics, medical facilities, defense-oriented, institutional, agricultural handling and processing facilities, gaming facilities, retro-fits, sports facilities, aircraft hangers, and special hazard systems.

Serving the Western U.S. for over a decade, Graphic Imaging Services, Inc. offers expertise in imaging and mapping solutions. They are authorized service providers for Fujitsu and Contex scanners.. An authorized ESRI Business partner, GISI has applied its tailor-made scanning and document retrieval solutions to such clients as the City of Mesquite, Hoover DAM, NV Energy, PG&E. Whether scanning 50 documents or 50,000, GISI assists companies in securing their past and their future, one document at a time.
