## SCAN FASTER AND SMARTER WITH MORE PRECISION IN EVERY PIXEL

The all new and perfected IQ Quattro X is a must have for every high-production environment.

**Faster:** IQ Quattro X is the 5th generation of Context CIS scanners, with enhanced speed and 3 times faster data transfer, the scanner is the essence of productivity.

**Smarter:** The Nextimage Remote app offers you a completely new way of working. The new app saves valuable operator time by bringing all main functions essential for basic scanning and copying in front of the operator directly on the scanner.

**Better:** Context Live Alignment is a new IQ Quattro X technology designed to improve image alignment across sensors ensuring precise and sharp alignment all the time, no matter the speed.

**Improved technology:** Context USB 3.0 implementation with xDTR3 is blisteringly fast and you won't have to worry about shoe shining or rescanning to get the width right.

### **Image quality**

The 48-bit CIS technology captures every detail from your document, then passes the best 24-bits through to the file at up to 1200 dpi optical resolution.

### **Fastest CIS scanner**

The IQ Quattro X scanners produce a scan speed of up to 17.8 inches per second in RGB color and 200 dpi.

### **3-position speed control**

Great for use with delicate originals. Temporarily shift down to slower scan speeds without using presets or altering software.

### **Green technology**

Energy Star® version 3.0 compliant using only 0.5W in standby mode.

### **High productivity**

Enhanced speed and data transfer rates makes the IQ Quattro X the essence of productivity.

## IQ Quattro X: High data transfer - superior image quality

### Context CleanScan CIS

The IQ Quattro Scanners are equipped with Context CleanScan CIS modules which facilitate optical image quality with dual-sided LED lighting. This eliminates creases and folds in originals normally a challenge for CIS scanners, and thus provides clear, crisp scans every time.

### Color fringe removal (CFR) technology

Color Fringe Removal (CFR) is an advanced Context patented filtering technology designed to remove the fringes inherent in CIS strobing scanning devices.

Context solutions are compatible with all leading large-format printers. See the full list at [context.com/nextimage-supported-printers](http://context.com/nextimage-supported-printers)
